Take the surface test

If your surface was previously sealed, take the surface test.

1. Place a 10cm² piece of cotton cloth on sealed concrete surface.
2. Pour xylene on cloth to saturate surface.
3. Cover with a sheet of cling film.
4. Wait for 30 minutes.
5. Remove cloth and observe surface.

If there is no reaction, the coating is likely an epoxy or urethane.

We recommend you seek professional help. Recoating epoxy or urethane coated surfaces needs specialist preparation.

If coating dissolves, or can be wiped away, or softens and becomes sticky, then coating is acrylic.

Apply Dulux Avista Sealed Surface Primer. Then apply Dulux Avista Waterbased Tintable Concrete Sealer.

If the coating wrinkles, the coating is most likely an alkyd.

We recommend contacting your Dulux Avista Representative for guidance.

Application

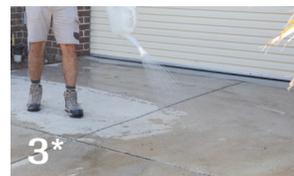

How to apply

1
Clean surface with a commercial grade, general purpose cleaner. Any oil stains should be treated & cleaned with an industrial degreaser.

2
Pressure clean surface at minimum 2000 psi and allow to dry. There should be no pooled or standing water on the surface.

3*
Acid etch using Dulux Avista Hydrochloric Acid. Pressure clean the surface before acid dries. Allow surface to dry.

4
Tape up any areas that require protecting.

Apply Dulux Avista Sealed Surface Primer OR Bare Concrete Primer per application instructions.

Apply Dulux Avista Waterbased Tintable Base Concrete Sealer per application instructions, allowing it to dry in between coats.

Watch how the professionals do it

* Step 3 only required for Bare Concrete Surfaces

BEFORE

AFTER

Prime

Use of primer improves adhesion of sealer to the concrete surface

BARE CONCRETE	SEALED CONCRETE
<p>Dulux Avista Bare Concrete Primer</p>  <ul style="list-style-type: none"> Increases adhesion of Dulux Avista Waterbased Tintable Sealer on bare concrete Penetrates and stabilises the concrete surface 2 coat application 10-12m²/L coverage 	<p>Dulux Avista Sealed Surface Primer</p>  <ul style="list-style-type: none"> Designed to create strong bond to previous acrylic coating with Dulux Avista Waterbased Tintable Sealer 1 coat application 10-12m²/L coverage

OR

Seal

Rejuvenate and protect the surface

Dulux Avista Waterbased Tintable Base Sealer

- UV and fade resistant
- Non-yellowing
- Resists stains, dirt and hot tyre pick up (when surface has been prepared properly)
- Good marking resistance
- 2 coat application
- 4-8m²/L coverage

Slip Additive

Add slip additive to increase slip resistance

Dulux Avista Slip Reducing Additive Powder

- Disperses readily and evenly through sealer
- Generally increases slip resistance of sealers
